

## Real-Time Query Manager: -ASK. LEARN. MASTER-

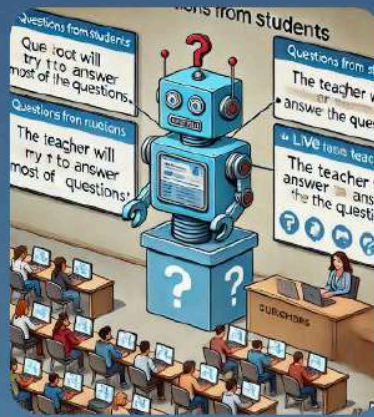

# Real-Time Query Manager

## -ASK. LEARN. MASTER-

### KEY FEATURES & HIGHLIGHTS

- 1 Instant Responses
- 2 Context-Based Answers
- 3 Scalable & Efficient
- 4 Reduced Teacher Workload

### Teacher-Uploaded Materials

Teachers upload PDFs of covered chapters, and the chatbot uses this content to generate accurate, context-based answers.

### Seamless Learning Experience

For off-topic questions, the chatbot redirects students to the teacher, ensuring that every query receives the appropriate attention.

### Personalized Education

Students receive immediate, tailored responses based on the course material, making learning more engaging and efficient.

The Real-Time Query Manager transforms education by providing students with instant, tailored answers to their questions using teacher-uploaded materials. This AI-powered chatbot ensures accuracy by referencing course content directly, enabling a seamless learning experience. It handles off-topic questions by redirecting them to the teacher, reducing workload while maintaining educational focus. By delivering context-aware, immediate responses, the tool fosters personalized education, making learning more efficient and engaging. Ideal for modern classrooms, the Real-Time Query Manager empowers students to "Ask, Learn, and Master" their subjects effortlessly, bridging the gap between traditional teaching methods and innovative technology.
